

Education

J.C. Bose University of Science and Technology, YMCA, Faridabad, Haryana

Bachelor of Technology - BTech, Computer Engineering

(Oct, 2022 - Jul, 2026)

Year-2022 | 12th Board CBSE | **92%**

Year-2020 | 10th Board CBSE | **95%**

Experience

Amazon | Software Developer Intern

[Certificate](#)

(From June,2025 - August 2025)

- Added latency metric in CXQO Camera Selection workflow to identify bottlenecks and delays.
- Updated retry strategy to handle **CVS throttling issues**, leading to a **30% reduction** in related **support tickets** post-deployment.
- Onboarded the batch async retrain API of Galactus service, enabling decommission of the primary fleet and driving **long-term cost benefits**.

Amazon | Software Developer Intern

[Certificate](#)

(From June,2024 - August,2024)

- Built an **AWS-based architecture (SQS, DynamoDB, S3)** for dynamic prioritization & cancellation of data sync operations.
- Designed **Lambda functions leveraging GSIs**, improving sync performance by 35% and reducing prioritized sync time by 50%.

Problem Solving

[LeetCode](#)

- Solved **750+ questions on Leetcode**.
- Achieved global **rank of 3316 out of 33,382** participants in LeetCode Weekly Contest 413.
- Achieved a **top 19% global ranking** in LeetCode contests with participation in over 10 contests.

Achievements

- Advanced to regional Rounds of Google's "Solving for India" Hackathon out of 300+ teams.
- Secured Top-10 positions in HACKED 2.0 at BML Munjal University, Gurgaon out of 100+ teams.
- Contributor at GirlScript Summer Of Code 24'.
- Winner of Armour CyberSecurity Hackathon for conceptualized a women's safety software aimed at preventing life-threatening situations in India.

Projects

TunedHeartz (Flutter / Firebase)

[Code](#)

- Engineered a music player, featuring real-time streaming to a group upto 10 members, a visually engaging UI, Authentication and interactive functionalities to foster social connections.

SwitchItOff(Flutter / Flame)

[Code](#)

- Created a sustainable game named "SwitchItOff" where we developed a ball-throwing game utilizing the Flutter Flame engine to simulate real-world physics. It features interactive gameplay with different themes. There are levels in the game with different switch positions.

CollegeCafe (Flutter / Firebase / Stripe)

[Code](#)

- Designed a comprehensive food ordering application with Flutter & Firebase, incorporating payment services via Stripe API with Google and Phone Authentication. Managed menu of over 30 items & facilitating cart management with precise price calculations and offers.

Skills

Languages : C, Java, Dart, Python, TypeScript, JavaScript.

Computer Fundamentals : DSA, OOPs.

Tools and Tech Stack: Flutter, Android Native, Firebase, MongoDB, Figma, Github, Software Testing, CI/CD pipeline, Postman, AWS Lambda , AWS SQS , AWS S3 , AWS DynamoDB, React , TailwindCss.
